

We find different kinds of useful wood everywhere. Here we took some American Chestnut off a barn in Mills River and made the bar top; added some tongue and groove pine from the interior of a barn near Fletcher Park to make the front; added some pallet wood and casters, and made a nice all-purpose bar or rolling table. You have to see this bar in person to appreciate the shiny Chestnut top contrasting with the older Pine front.

About 44" tall, 48" wide and 18" deep.
