

I found some nice 2x10 lumber discarded at a construction site. And I had some nice pipe sections left over from another project. I put them all together, stained the surfaces gunstock red, and ended up with a nice counter-height (36") table and matching bench. The table seats 4-6 comfortably.

54 inches long, 36 inches high, about 35 inches wide. Plank top is about 1.5" thick. You need to add chairs or stools that are 24" tall.
