

A customer had a large black metal flat file – the kind used for storing artwork or blueprints so they could lay flat. She wanted to be able to roll it around her apartment and wanted a counter-height top with room for pull-out drawers beneath. So we used some repurposed 2X4's for the base, some pallet wood for the top, added some beefy locking casters, and painted the wood a sheet metal gray. Looks great in her apartment.

Roughly 40 inches wide, 36 inches tall, and 29 inches deep. A practical and elegant solution.
