

Everybody likes Lineberry carts, those industrial rolling carts with heavy cast iron wheels. They make great coffee tables. They usually sell for around \$250 each, or more if in really great condition. We found some old heavy cast iron wheels at a flea market, added some pallet wood and black metal accents. The result is a very Lineberry-like cart, which will make a great coffee table for your living room or man-cave.

Roughly 48 inches long, 30 inches wide, 18 inches tall.

\$200
