

## VITA NOVA SALVAGE

“We bring new life to vintage finds!”

Black locust is a fairly rare hardwood – I brought some slabs with me from North Carolina. I sanded and polished this live-edge piece and used pallet wood and some repurposed lumber to make a unique serving bar. The locust is very dense wood and it really shines when coated with polyurethane. A small upper shelf sits in back on the server side. Ideal for that one-of-a kind patio or man-cave look.

42 inches high, 70 inches wide and about 12 – 15 inches deep (live edge varies).
