

In Swannanoa we found a great 10 foot slab of mahogany. A cabinet maker abandoned it when he had to move out of state. We cut it in half, smoothed out all the edges, and planed it down to about 1 ¾ inches thick. Then we added a nice strip of white oak in the center for contrast and glued it all together. After many coats of polyurethane and lots of sanding, we then found a pair of retro legs which we spray painted black. The result is a BEAUTIFUL one-of-a-kind small dining table.

Almost 58 inches long, 34 inches deep, and 30 inches high.
