

We found some nice oak and chestnut barnwood in Mills River. The oak as placed on the barn was partly exposed. So each piece has the gray, wrinkled, look side-by-side with the dark, smooth, protected look. The undercarriage is also made from oak and the stringers are abandoned Directtv brackets. Makes a unique statement for any dining room or man cave.

30" tall, about 65" wide and 29" deep.
