

We love finding unique looking pallets, and we find them all over Western NC. This table is made from five different pallet woods (red pine, white pine, red oak, pin oak, and poplar). We added some black legs made of repurposed lumber and ended up with a unique table for a customer's covered patio. Because pallet wood is usually heat treated for extra protection, it's easy to repurpose for outdoor use.

This table is roughly 36" wide and 72" long.
