

I found an old kitchen dinette table in Fletcher, removed the middle leaf and glued the two semi-circular pieces together. After lots of sanding, I restained it a faded gray color sealed it with polyurethane for a glossy impenetrable shine. I added a metal table base, spray painted black to match the chairs. Makes a nice patio table set.

36 inches wide, 30 inches high. Top is about 1" thick. Comes with four recovered black metal patio chairs.
