

With the bigger, slimmer TV's available now, people tend to throw out their old boxy TV consoles. The consoles can be repurposed into all sorts of things – especially pie safes. This was an older pine TV console – we sawed out the pine paneling on the doors, added vintage black screens, added some legs to raise it off the floor, and painted it an antique green. Has three inside shelves plus a drawer at the bottom.

A unique addition to your kitchen or pantry.
