

We found an old table in Asheville that had some odd metal legs and a pine top that was poorly stained gray. Looked like a DIY job gone bad. We swapped out the legs for some heavy metal brackets that we found off a utility company wire spool, then sanded down the gray pine to bring out its original glory, and added some black metal accents. Then we added a set of four maple and black leather chairs to make a nice looking dinette set.

30" tall, about 65" wide and 32" deep.

Table Only - \$275

Table With 4 Chairs - \$375
