

A customer asked us to make a small writing desk out repurposed barn wood. She planned to place it in a corner in her rental in Lake Lure. Had to be no more than 36" wide and 18" deep. She also wanted galvanized plumber's pipe for the legs. She was very happy with the way this piece turned out – so were we!

We make special orders all the time – any type of wood or legs, any color, and any size to fit your space.
