

## *VITA NOVA SALVAGE*

A customer wanted a tall narrow table to fit in kitchen between a range and a buffet. She also wanted it tall enough so she could reach underneath to the dog food and bowls without hitting her head. So we made this nice little table – the top is ambrosia maple and the legs are pipe. Fit the space nicely.

42 inches long, 18 inches wide and about 36 inches high. A cute sturdy table with many uses.
