

A restaurant in Asheville was renovating and moving out some of their older dining tables. This one had a ragged edge on one side and was heavily stained. After cutting off the bad end and thoroughly sanding it down, I stained it gunstock brown and added a black metal pedestal base. Makes a nice accent table or small dining table. Comfortably seats four.

Roughly 36" wide, 30" deep, 30" high. A unique look for your dining or nook area.
