

We bring new life to vintage finds. In Asheville, we found some welded steel stools, very heavy and industrial-looking. In a salvage yard, we found a beautiful iron ring, not sure where it came from. We added some old oak from a remodeled cottage in Mills Rivers, and glued and screwed it all together. The result is a nice heavy-duty table that would look great with any décor.

This would make a great entry table, center table for a foyer, or bar-pub table. This is a one-of-kind piece, we are unlikely to find the exact same pieces to make another. 36" high, 36" diameter. Requires 24" chairs if you want to seating.
